The movement of ethical thought, now so important to all sections of the United States and portions of Europe, had its origin in this city, where, in the year 1895, the Ethical Culture Society was founded. This society has been influential in promoting ethical thought and action, and its influence has extended far beyond its original membership. The society has been active in many areas, including education, social reform, and international relations.

The Ethical Culture Society was founded in 1895 by William F. Allen, a prominent teacher and philosopher. The society was established as a response to the need for a more moral and ethical society, and it has continued to promote ethical thought and action ever since.

The society has been active in many areas, including education, social reform, and international relations. It has sponsored many lectures and discussions on ethical topics, and it has also been involved in the work of the American Conservation Congress, which was established in 1895. The Congress was founded by a group of prominent ethical thinkers, including William F. Allen, and it was the first national organization dedicated to the promotion of ethical thought and action.
